

Council of Architecture Teacher's Training Program

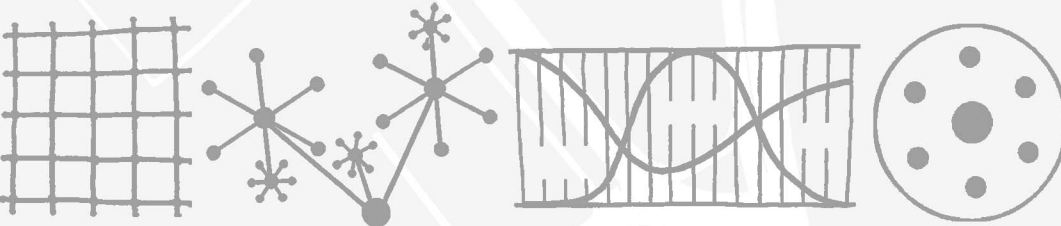

Education of A Design Professional An Ekistics Approach

Convened by, Prof. Jayashree Deshpande, Director, COA-TRC, Pune
Coordinated by, Prof. Anand Achari,
Vivekanand Education Society's College of Architecture, Mumbai

Preamble:

Ekistics being the science of human settlements includes a comprehensive and holistic dimension across the disciplines ranging from the study of settlements and society, demographics, land economics, sociology, environment, legislations, transportation and networks, regional planning and GIS.

Applying Ekistics thinking enables breakdown of the complexity of man-made environment for study and understanding their interrelatedness and interconnected nature. It also improves observation to a perceptive level in identifying problems and potentials that need intervention. The knowledge of a subject that is often separated in syllabus form and allocated to teachers results in learning as an isolated activity within the course. The Ekistics workshop brings teachers of varying age and experience together irrespective of their assigned subject. Thus, there is mutual relationship with relevant understanding in value based learning for the course.

Registration Process:

Teachers/ Architects who wish to register for the training program either under Collaborative Training Program (CTP) or as independent individual may do so by filling up the attached Google form.
