# NATIONAL ONLINE FACULTY DEVELOPMENT PROGRAM “INTERPRETATIONS OF SDGs IN ARCHITECTURE - ARCHITECTURE & DESIGN STUDIES”

17<sup>th</sup> July 2023 - 21<sup>st</sup> July 2023

### PREAMBLE

Paul Goldberger writes that great buildings are those that have expanded our sense of human possibility - they shape our very experience of who and where we are in the world. Buildings and spaces are not inanimate objects; they are occasions for human contact, they frame our understanding of place and this makes them a living part of our world. We as architects can directly shape the outcomes of a design process to the betterment of a Community's overall quality of life, sustainability, social equity, health, and resilience. Interpretation of SDGs in Architecture pedagogy: Track 2 looks at architecture design and urban design as the act of designing buildings consistent with these goals ensure that we are creating healthier places and, therefore, healthier people, communities, and societies. The aim is to understand the SDGs from an architect's point of view.

#### Key Take-Aways for Participants :

1. To help teachers/mentors establish a relationship between architecture - learning - sustainable development goals.
2. To channelize the teaching-learning process in a way that is in adherence with the 2030 Agenda for Sustainable Development.
